

NATIONAL ENERGY SUPPLY NETWORK

THE **ONE SOURCE** FOR ALL YOUR ENERGY NEEDS

HOW MUCH **TIME** DO YOU SPEND CALLING ENERGY PROVIDERS AND NEGOTIATING RATES IN YOUR AREA?

Do you have any idea if savings are available in other areas of the country?

YOUR ENERGY PARTNER

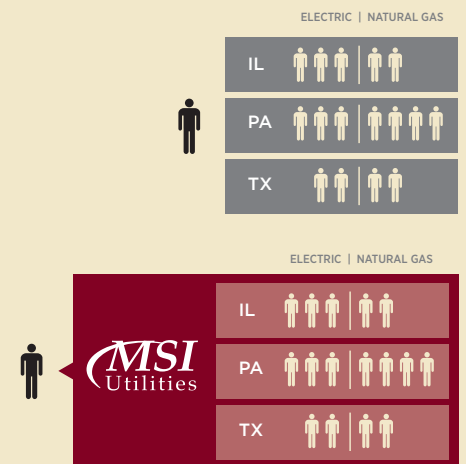

Most businesses don't realize that they have a choice of who supplies their natural gas. Many states have deregulated for natural gas for larger consumers only. However, in some parts of Texas, Oklahoma and most recently Louisiana, you are able to choose a supplier if you use a certain amount of natural gas similar to the volume used by a medium-size restaurant, a dry cleaner, or an apartment building. When you have a choice in who supplies your energy, you have an advantage.

Would it save you time and money if you had one point of contact for ALL of your energy pricing needs nationwide? MSI Utilities has built nearly 19 years of utility knowledge and an outstanding supplier infrastructure. We have assembled a nationwide supply presence with local, regional and national energy service providers who all compete for your business.

MSI is a market leader at providing energy products to commercial and industrial customers. Our national energy network includes approximately 150 natural gas and electric companies reaching *all* of the deregulated areas in the U.S. We hand-select our energy suppliers to ensure superior reliability and cost-effective service. Smaller local firms only have local utility knowledge; MSI Utilities has national energy supply knowledge. Our supplier partnerships provide a **strategic advantage** for businesses who own facilities in multiple states. We monitor pricing **daily** and unlike other energy management companies, MSI Utilities' fees are included in all pricing quotes with no additional consulting fees to our clients!

DID YOU KNOW?

If you purchase energy for a business with chains in Illinois, Pennsylvania and Texas, you could end up contacting **16** separate companies for electric and natural gas. When MSI Utilities manages your energy needs, it's **one call** for all your pricing, billing and customer support.
