About MSI Utilities

Our mission is to provide the lowest cost energy available while maintaining the highest level of customer satisfaction. Energy is one of the largest expenses for business owners. Between 2003-2008 natural gas and electricity saw increases of 400% and 100 % respectively, causing a major drop in company profits nationwide. MSI Utilities works as a partner in stabilizing these costs. With our large network of suppliers nationwide MSI is able to offer low energy rates, reliability as well as professional customer service to nearly all business types.

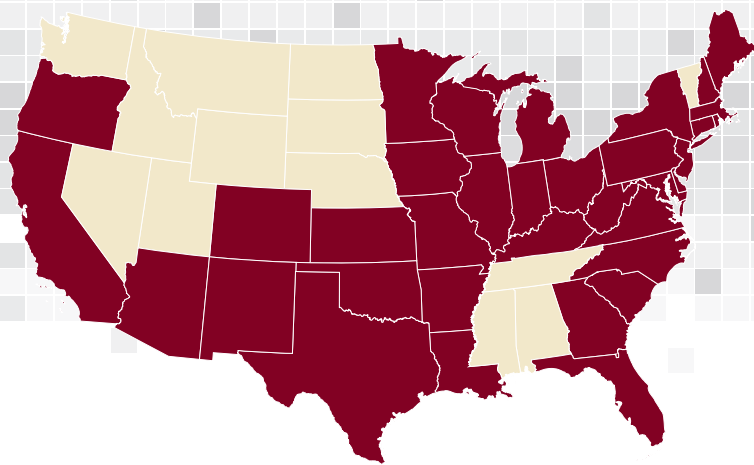

Unlike other energy management companies, MSI fees are included in all price quotes. There are no additional consulting fees to our clients.

We are not a utility. We do not generate electricity nor do we produce natural gas. MSI is a licensed agency working with the largest energy suppliers in the market today. We identify the lowest energy prices for customers in every deregulated energy market to secure energy prices that save our clients money

Our customer retention rate is exceptionally high due to our ability to secure low cost energy while maintaining superior customer support.

THE **ONE SOURCE** FOR ALL YOUR ENERGY NEEDS

MSI is a market leader at providing energy products to commercial and industrial customers. Our service area includes the eastern two-thirds of the U.S., California, Arizona and Oregon. The ability to adjust to today's fast moving energy markets with reliable suppliers has made MSI Utilities a trusted **energy partner** to thousands of businesses nation wide.

We Save Our Clients Time, Money & Energy

When it comes to energy purchase you have options. Tracking current energy rates and maintaining relationships with vendors takes time and resources. Here are the advantages to partnering with MSI Utilities:

TIME

- We act as a liaison between our customers, suppliers and utilities by dealing with ALL billing and pricing matters
- We are your one point of contact for all energy territories in the U.S.

MONEY

- We negotiate the best prices to fit your unique energy needs
- We monitor all state regulatory commissions to better determine if energy savings are achievable
- State-of-the-art pricing model lets us immediately compare many options at once

ENERGY

- MSI Utilities is determined to lower energy consumption by promoting conservation and energy efficient upgrades
