

MSI Utilities is a trusted energy partner to thousands of businesses nationwide. Our professional consulting staff has provided innovative utility savings programs since 1995.

INTEGRITY. EXPERIENCE. INNOVATION.

About MSI Utilities

Advantages

- Assisted over **20,000 customer accounts** nationwide
- Has provided business to business energy solutions since 1995.
- **A+ rating** with the BBB since 2012
- Customized energy procurement for **electricity, natural gas, and propane**
- Turnkey **solar** projects
- **LED lighting** upgrades

Our mission is to provide low cost energy, lower energy consumption and maintaining the highest level of customer satisfaction. Other than labor costs, energy remains one of the largest expenses for many business owners. MSI Utilities works as **your energy partner**, in stabilizing these costs. With one of the largest supplier networks nationwide MSI offer the lowest energy rates, reliability, energy efficiency as well as top grade customer service.

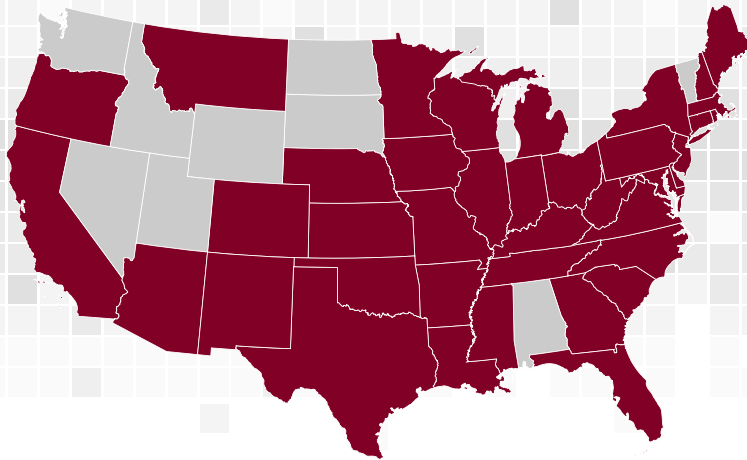

Unlike other energy management companies, MSI fees are included in all price quotes. There are no additional consulting fees to our clients. We are not a utility. We do not generate electricity nor do we produce natural gas. MSI is a **licensed agency** working with the largest energy suppliers in the market today. We identify the lowest energy prices for customers in every deregulated energy market to secure energy prices that save our clients money

Our customer retention rate is exceptionally high due to our ability to secure low cost energy while maintaining superior customer support.

MSI's national network includes approximately 150 natural gas and electric utilities and over 50 energy suppliers.

THE ONE SOURCE FOR ALL YOUR ENERGY NEEDS

MSI is a market leader at providing energy products to commercial and industrial customers. Our service area includes all deregulated Natural Gas and Electric markets in the US.

We Save Our Clients Time, Money & Energy

When it comes to purchasing energy, you have options. Tracking current market conditions, energy rates as well as maintaining relationships with multiple vendors takes valuable time and resources. Here are the advantages to partnering with MSI Utilities:

TIME

- We act as a liaison between our customers, suppliers and utilities by dealing with ALL billing and pricing matters. One point of contact for all energy territories in the U.S.
- Our State-of-the-Art pricing model lets us immediately compare many options at once for a quick turnaround.

MONEY

- MSI's market experience and supply volume creates an advantage in negotiating lower energy costs.
- We continue to monitor all state regulatory commissions to better determine if energy savings are achievable in other territories.

ENERGY

- Energy efficiency products can reduce consumption by typically 10-25% depending on your business type and how you consume energy.

Businesses Served

Commercial Property
Health care
Industrial
Schools
Local Government
Hospitality
Restaurants
Bakeries
Auto Dealers
Dry Cleaners

Reduce Energy Consumption

Energy efficiency has evolved into a much larger part of our consulting over the years. MSI consultants will discuss your facility and note potential improvements with LED lighting or highly incentivized renewable energy projects.
